

Roaches Check In...But They Don't Check Out!

- **Roach Motel**® is ideal for kitchens, bathrooms and basements.
- **Roach Motel**® is extremely effective in trapping all kinds of roaches and other crawling bugs including crickets, scorpions, spiders, palmetto bugs and waterbugs for up to 4 Months.
- **Roach Motel**® attracts roaches into the trap. Once inside, they become stuck in a powerful glue.
- **Roach Motel**® is clean and easy to use. No need to clean out cabinets. No need to pick up dead bugs throughout the house. Just throw Roach Motel® away when full.
- Use **BLACK FLAG**® Ant, Roach & Spider Killer spray to eliminate heavy bug infestations. Continue trapping to monitor reinfestation.

DIRECTIONS FOR USE:

1. Remove traps from wrapper. Place in corners, along walls, under sinks, in cabinets or behind appliances where roaches and other crawling bugs live and hide.
2. Allow 3-4 days to work. If trap is empty, move to another location. Since traps will contain insects, children should not handle them.
3. The trap will be effective for up to four months. After two months or when trap is full, flip trap over. Discard in trash when both sides are full.
4. Avoid contact with adhesive inside the Motel because it is very sticky. If any adhesive gets on your skin, rub gently with vegetable oil, then wash with soap and water. Repeat if necessary.
